

Polaris 2XT bathroom lock - 96 mm centre, 18 mm forend

Description

Magnetic flush-mounted lock. The central latch is in plastic material, with the same colour of the forend. The bathroom lock blocks the latch also functioning as bolt but leaving the handle free to go down. The lock features no protuberances on the forend, thanks to the latch which is entirely retracted into the casing. Steel front (18 mm) with rounded edge, 35,5, 50,5 and 60,5 mm backset. Centre, 96 mm. Knob-plate, 6 mm. Steel lockcase with through screw-holes for handle assembly.

Note. The bathroom lock can't make the latch come in. To open the sash, it is necessary the handle assembly.

Application

The symmetrical, magnetic latch makes the lock right/left handed.

Mounting

Cut a slot and include a milled component on the panel (dimensions in drawing). Fix the lock with two screws (3,5x20 mm).
