

BUTLER 732

With **BUTLER 732 wardrobe lift**, the full height of the wardrobe can be used efficiently.

At the simple push of a button, the **height adjustable clothes rail lowers by 112 cm**, making even high-placed clothes easily accessible.

A person of average height can comfortably reach up to 190 cm. This means the clothes rail, in its upper position, can be installed as high as 300 cm above the floor.

This maximizes **wardrobe storage capacity**, as the lower part of the wardrobe can still be used for an additional clothes rail, shelves, or other **storage solutions**.
