

BUTLER 730 provides electric height adjustment up to 70 cm, lowering the clothes rail to a comfortable reach at the touch of a button. The rail moves out and down towards you for easier access and overview, and you can stop at exactly the height you prefer. The result is better ergonomics and freed-up space below for wire baskets, shelves, or shoes. The design is inclusive, comfortable for everyone and works especially well for wheelchair users.

- Can be fitted simply into new or existing wardrobes measuring 60-160 cm wide
- Simply fitted in wardrobe
- Lowers clothes out of the wardrobe to within comfortable reach of a seated person
- The motor units take up little space and is screwed into the sides of the wardrobe.
- Easy height adjustment with a push button (available as an accessory).
