

NEW GENERATION OF DYNAPRO TIPMATIC SOFT-CLOSE 1.2

Dynapro Tipmatic Soft-close - the perfect combination of handle-free opening and gentle closing! The new generation of Grass Tipmatic Soft-close features an optimised version of the tried-and-tested system and a range of new functions. One gentle tap is enough to activate the system, while vigorously pushing the drawer closed or **NEW! gently pushing the drawer closed until it reaches the stop** ensures that the Tipmatic Soft-close unit is properly tensioned and reactivated.

Implementing this second method allowed us to significantly reduce the distance that the drawer needs to be opened before you can close it, increasing operating comfort even further. This also results in a reduction in the dead centre. The new components have also led to a reduction in noise levels.

UPDATED FUNCTIONS

- Drawer can be gently pushed shut
- Drawer only needs to be opened a short way before it can be closed
- Reduction in the dead centre
- Reduced noise levels
